

Motivation Letter for Master of Science in Artificial Intelligence

Dear Admissions Committee,

I am writing to express my profound interest in applying for the Master of Science in Artificial Intelligence program at your esteemed university, supported by the Australian Award Scholarship scheme. With a strong academic foundation in Informatics Engineering and practical experience in developing machine learning models, I am eager to deepen my expertise in computer vision and natural language processing at your institution.

During my undergraduate studies, I developed a strong passion for software engineering and data science. For my final year project, I designed a deep learning architecture using the Swin Transformer model to process complex image datasets. This experience taught me not only the technical intricacies of neural networks but also the real-world impact that AI can have on solving complex problems. Furthermore, my recent internship as a Software Quality Assurance engineer allowed me to understand the importance of building scalable and reliable systems.

I am particularly drawn to your university because of the cutting-edge research conducted at your AI Research Lab, specifically in the area of visual recognition and generative AI. The curriculum perfectly aligns with my career goal of becoming an AI Researcher dedicated to developing ethical and accessible technological solutions in Indonesia.

Studying abroad through this scholarship will not only provide me with world-class academic training but also expose me to a diverse, international community. I am confident that my technical background, combined with my dedication to continuous learning, makes me a strong candidate for this program.

Thank you for considering my application. I look forward to the opportunity to contribute to your academic community and grow both personally and professionally.

Sincerely,

Leyla
